

REMARKS

Claims 1-87 remain pending in the instant application. Claims 37, 63 and 86 have been amended to remove the term "parallel" and more accurately claim the instant invention, no amendment has been made to overcome any prior art. The specification and abstract have been amended to correct obvious typographical error and to more accurately describe the instant invention. No new matter has been added.

Should the Examiner believe a conference would advance the prosecution of the application, the Examiner is encouraged to telephone the undersigned counsel to arrange such a conference. As each of the pending claims is believed to define an invention, which is novel and unobvious. Favorable consideration of this case is respectfully requested.

Respectfully submitted,

Date: June 28, 2004
